PROJECTS

Amele Forensic Tool

Forensic Tool

Collect digital evidence in one place. A fast, auditable, and plain workspace for disk, RAM, and Android acquisition.

Hyperstructure

Modern Social Media

An open-source modern social media app built as a hobby. It uses Vue and Rust, and MongoDB as its database. (github.com/melihemik/hyperstructure )

Sievert

Simulate future problems today.

A platform that simulates future problems today. It uses Vue and Python. (sievert.noirlang.tr )

Codetasker

Open-Source, Two-Way GitHub TODO and Task Management Platform

It uses Go and React, with Vite.js as its engine. (codetasker.noirlang.tr )

Kriya

An autonomous AI-powered penetration testing tool.

It uses the Go programming language. (github.com/noirlang/kriya )

Differ

A focused desktop Git change explorer designed for commit history, contributors, differences, and repository status.

It uses Rust and tauri. (differ.noirlang.tr )

Forgetag

It is a modern, "local-first" desktop archiving application that lets you organize your files, folders, and notes using tags and metadata. Your data always remains under your control.

It uses Rust and tauri. (forgetag.noirlang.tr )
